<b>Introduction</b>	<b>11</b>
---------------------	-----------

## MARKETING AUTOMATION PHILOSOPHY

<b>1. Marketer's new challenges</b>	<b>15</b>
Mobile first	18
An even newer consumer	21
Hyper-personalization	24
GDPR and user tracking	26
The end of the cookie era	29
Transparency in data collection	30
<b>2. Two revolutions in marketing</b>	<b>31</b>
Processes and codification of knowledge	32
Big Data, machine learning and artificial intelligence	34
<b>3. Who are we and why was this book written?</b>	<b>37</b>
<b>4. Artist's shit – excuse my language, but it actually happened</b>	<b>39</b>

### Part I

## REVOLUTION 1.0 A FEW WORDS ABOUT THE CODIFICATION OF PROCESSES IN MARKETING

<b>5. From sales funnel automation to AI – the story of automation platforms</b>	<b>43</b>
Automation in B2B and B2C	43
When everyone follows #marketingautomation	46
Focus on customer data	47
Marketing Automation versus Customer Data Platform	50
<b>6. The most important functions of the Marketing Automation system, namely the foundations of Revolution 1.0</b>	<b>56</b>
Anonymous identification and 360-degree profiles	56
Automatic contact segmentation	60
Events, conditions, actions	64
Single channel, multi-channel, omnichannel	66
1-1 personalization and dynamic content	68
A smarter outbound	69
Cross-channel analytics	72

<b>7. Marketing automation: facts and myths</b>	<b>75</b>
Marketing automation is an area exclusively for marketers	75
Marketing Automation is just software	77
You don't have a customer base – automation is the best solution	78
Marketing Automation is only for the largest companies	80
If you want a good implementation, hire an agency	82

Part II

**REVOLUTION 2.0  
HOW BIG DATA SHAPES MARKETING**

<b>8. Taming Big Data</b>	<b>87</b>
The 7 Vs of Big Data	89
The modern Big Data market	92
Big Data trends	94
<b>9. Why does Google know better? And doesn't it know too much?</b>	<b>97</b>
<b>10. Information chaos</b>	<b>100</b>
<b>11. Correlation instead of causality</b>	<b>102</b>
<b>12. Everything is data</b>	<b>106</b>
<b>13. The algorithm will choose a series and compose a playlist for you</b>	<b>108</b>
<b>14. Data as company capital</b>	<b>111</b>
<b>15. The use of Big Data in marketing</b>	<b>114</b>
How it's working? How is the data collected?	115
What data can I collect and what should I collect?	119
Data ethics	121

Part III

**ARTIFICIAL INTELLIGENCE IN MARKETING**

<b>16. A brief history of algorithms and machine learning</b>	<b>125</b>
<b>17. Machine learning or artificial intelligence</b>	<b>127</b>
<b>18. What artificial intelligence can do</b>	<b>129</b>
<b>19. What artificial intelligence cannot do and will it be able to do?</b>	<b>132</b>
<b>20. Should we be afraid of artificial intelligence?</b>	<b>136</b>
<b>21. Types of machine learning algorithms and their application in marketing</b>	<b>138</b>

Collaborative filtering	139
Neural networks	142
Deep learning	143
Regression algorithms	145
Decision trees	146
<b>22. Artificial intelligence in marketing</b>	<b>147</b>
Chatbots	148
Better, personalized search results	149
Virtual assistant	151
Automated e-mail	153
Database segmentation	155
Welcome and birthday coupons	156
Push notifications	158
Product recommendations	160
Video Body Language Monitoring	161
<b>23. Machine learning limitations</b>	<b>164</b>

#### Part IV

### A NEW WAY OF MARKETING TECHNOLOGIES

<b>24. Personalization versus hyper-personalization</b>	<b>167</b>
<b>25. A new approach to measuring efficiency in e-commerce</b>	<b>171</b>
<b>26. Deep Behavioral Profiling</b>	<b>173</b>
<b>27. How to build an offer based on data that is not yet available</b>	<b>175</b>
<b>28. Marketing based on artificial intelligence predictions</b>	<b>177</b>
Prediction of the customer's life value	178
Purchase prediction	180
Churn prediction	181
Prediction of the optimal time and communication channel	183
<b>Bibliography</b>	<b>185</b>
